of high-tech engineering.*

MASTERVERVIEW®  
ROLL DOWN SHADES

### *Enhance your Lifestyle!*

When making an outdoor living space decision, you want to make sure you are receiving all the conveniences you desire in one product. A Masterview Motorized Screen will provide you with a modern and sophisticated home décor, while turning your patio into a centerpiece of the home. In a matter of seconds, you and the family will be able to enjoy a relaxing evening doing the finer things in life from the comfort of your own home.

With over 20 years of manufacturing experience, ASM provides a rigid, solid frame of superior quality. Frames are available in several colors and sizes. ASM screens are designed to provide energy efficiency while improving the aesthetics of your home, office, patio or other enclosures.

### *Built Around Your Needs*

No matter what your needs are, when you purchase a Masterview Motorized Screen, you have the piece of mind knowing we have the necessary components to satisfy them. Our system allows you, the homeowner, to completely customize each individual unit based on your LIFESTYLE.

From electronics to fabric density and color, to the frame color to remote controls, you will have the ability to adapt each screen to fit your home.

### *Expanded Outdoor Living Space*

It's no secret: all of us wish to utilize our outdoor living space more often and effectively. By choosing a crank operated or motorized exterior system, you are making a lifestyle decision. Our Masterview Motorized Screen will immediately increase the size of your family's living space while keeping the bugs out during the warmer months, allowing the breeze through during the cooler ones, as well as blocking harmful UV Rays. With the click of a button, you can now move your dinner outside to a breezy bug-free environment.

### *Electronics*

The Masterview Motorized Screen electronics will put the beauty of your outdoor screen into motion. Designed by Swedish and American engineers, these industry leading components are the perfect marriage of power, precision and integration. Our state of the art electronics support low data rates, low power consumption, security and reliability. With a multitude of programming options, you have the convenience of total control and the quality assurance, technical support, and innovation that is the cornerstone of every product we offer. Our motors and electronics are innovation at its best. With multiple configurations available, the agility of our motors and electronics puts them in a class of their own.

### *Questions to Answer:*

- Which frame color do I want?
- Which bottom bar color do I want?
- What color and density screen would work best for my home?
- How would I like my unit mounted?
- Which electronic configuration would make operating my units easiest?

### *Warranties*

Powder Coating Warranty: AAMA 2603 (Interpon D1010, 10-year inland, 1-year coastal within 1 mile of coastal shoreline)

20-50NM Override Motors are supported by a 5-year replacement warranty, 20-50NMSmart Motors are supported by a 3-year replacement warranty.

Electronics are supported by a 2-year replacement warranty.

### *Mounting Options*

- Flush Mount: Installed flush to the wall
- Trapped Mount: Installed in a restricted opening
- Recessed Mount: Installed with side rails or hood concealed in a wall, ceiling or other architectural feature.

# Exterior Zipper Track System

# ASM ZipperTrack

The Masterview ZipperTrack Screen System brings together the craftsmanship of design and the innovation of high-tech engineering. Perfect for Garages, Outdoor living spaces, Restaurant patios, and much more!!!

Available in Crank, or Motor operations

The system is available in a variety of fabrics, densities, and colors which provide the capability to block out up to 95% of Ultra-Violet solar rays. The systems extrusions are available in four colors (white, bronze, beige, and ivory), Special order colors are available with 1000 lb minimum orders for each shape needed.

This product is designed to shelter against insects while providing energy-efficient sun-shading, climate control capability, and rain/wind reduction.

Our detailed manual is organized with an emphasis on measurement, ordering, and installation, making it an all-inclusive reference guide to understand the system.

The following instructions are extensive, HOWEVER with all manufacturing, these instructions are to be considered standard and used as a primary guide until experience is gained.

# Outside mount

The picture below shows an opening with a screen that is installed using a flush mount on the outside of the opening. Flush mounting can just as easily be installed outside (facing away from the house) or inside (facing into the house) of the opening. In the picture below the system is mounted flush on the outside of the opening, here the ASM automatically added 5 1/2" for the hood and 2" on either side for the side rails. *When measuring width, make sure to check the bottom, middle and top of the opening, and take the widest measurement. When measuring height, measure the left, middle and right sides, take the tallest measurement.*

# Inside Mount

## Finished Opening

In the photo below, the end user needs the screen to be installed within the opening. In this instance the dealer takes the measurement of the opening, under “kind” column note “ Finished”

When measuring for a “ finished” opening, take the shortest width and deduct  $\frac{1}{4}$ ". Remember to take bottom, middle and top of the opening.

When measuring height take left, middle, and right sides, taking the tallest measurement, if one side is longer the installer will have to field cut the side track or level the bottom before installing the hood.

# Measurements

## ▣ **Tips on Measurement**

- ▣ When taking width and height measurements, experience suggests that a great way to keep installation difficulties to a minimum is by taking top, middle, and bottom for width, and left, right, and middle for height. Going this extra step has proven to be an effective way of discovering potential issues before the actual installation.
- ▣
- ▣ Each opening is different, each wall and floor has its own variations, and deviations. No matter how flush and plum things appear, using the recommended measuring method will prevent or prepare the installer for taking steps to keep the system level.
- ▣
- ▣ When measuring for a buck opening, always take the tallest height, and the widest width.
