

# Easily create an ESTIMATE yourself

[www.solarprotectionscreens.com](http://www.solarprotectionscreens.com)

- Step 1 Multiply the quantity by \$80.00
- Step 2 Arched windows add \$20.00
- Step 3 Smaller windows subtract \$15.00
- Step 4 Larger windows add \$15.00

*The Standard Window Size is (3' x 5') 35" x 60". This worksheet is based on this standard 3' x 5' – most installed size window on homes and is usually located on all 4 sides and the 2<sup>nd</sup> story. Larger windows can be found on the front and back sides and are mostly on the 1<sup>st</sup> floor. Smaller windows are usually located on the sides and around entry areas.*

*No need to measure each window, simply identify a 3' x 5' window and visibly compare the size of the other windows to smaller or larger.*

*An exact estimate cost to be provided at time of measurement, this quick estimate worksheet is to provide you an approximate cost.*

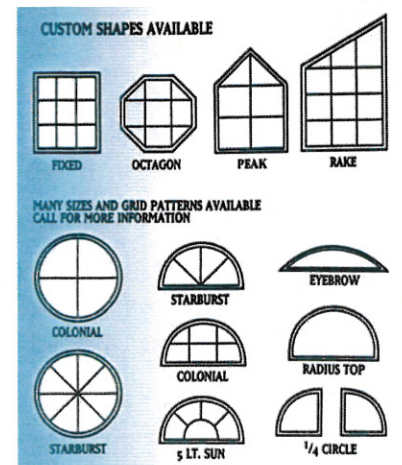

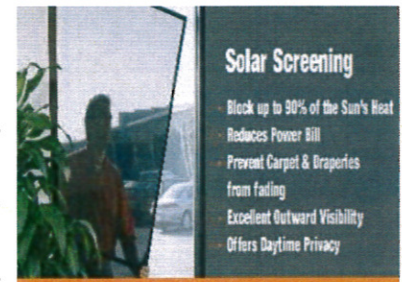

QTY. # Windows \_\_\_\_\_ X \$80.00 = \_\_\_\_\_

QTY. # Smaller \_\_\_\_\_ X -\$15.00 = \_\_\_\_\_

QTY. # Larger \_\_\_\_\_ X +\$15.00 = \_\_\_\_\_

QTY. # Arched \_\_\_\_\_ X +\$20.00 = \_\_\_\_\_

**Total Estimate Cost** \_\_\_\_\_

**Whole house discount**  
**Yard sign discount**  
**Less than 6 windows**  
**Glass Patio Sliding 2 Door Enclosure**  
**Perfect Breeze Aluminum Screen Doors**  
**PGT – Garage Door Solar Enclosures**
